

# Images of the Universe

Professor Mike Bode

Astrophysics Research Institute  
Liverpool John Moores University

Thursday 10 November 2005 at 6.30 pm

Surface Science Research Centre  
University of Liverpool

In this illustrated talk, we will take a journey from the solar system to the outer reaches of the Cosmos. Along the way, we will explore how some of the stunning imagery arising from modern astronomy can teach us about the nature of the Universe in which we live.

Information will also be given about how you may learn more about astronomy by a variety of means and also access some of the beautiful images themselves.

Light refreshments will be  
available from 5.30 pm

Secretary: Dr D S Martin
