

The Particle Odyssey

A Journey to the Heart of Matter

Frank Close

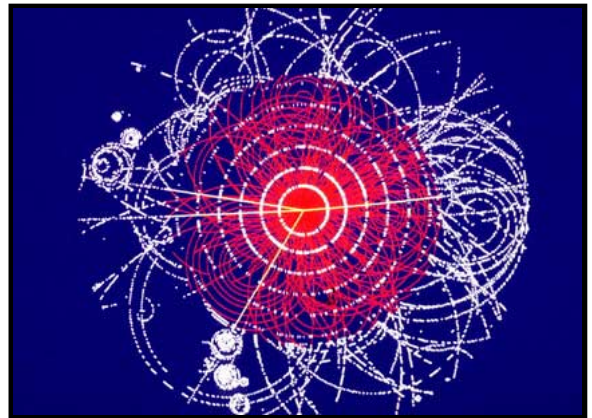

Thursday 17 February 2005 at 6.30 pm

Merrison Lecture Theatre

Daresbury Laboratory, Warrington

(for location see <http://www.clrc.ac.uk/Activity/ACTIVITY=DLMaps>)

Why is there anything in the universe at all? Where did matter come from? This will be a highly illustrated presentation on how our understanding of the nature of matter developed through the 20th century and will highlight the big questions facing us in the 21st.

Frank Close is a theoretical high-energy particle physicist and, in addition to his research, he is dedicated to the public understanding of science. He gave the Royal Institution Christmas Lectures "The Cosmic Onion" and has written several popular books about science.

This is a joint meeting arranged by the Manchester and District Branch and will be followed by a light buffet served in the Daresbury Science Centre.

Light refreshments will be available from 6.00 pm

Secretary: Dr D S Martin Email: IoP@liv.ac.uk
