

# Too Hot To Handle

*Laura Grant*

Monday 13 December 2004 at 2 pm

Chadwick Lecture Theatre  
Department of Physics, University of Liverpool

Take a journey that starts in the centre of the Sun, our local star. Discover how fusion reactions in stars both release the energy and create the elements necessary for life on our planet. This lively presentation, aimed at 14–16 year olds, uses animations and live demonstrations to explore the exciting world of plasma physics and fusion research.

This is a schools' lecture, but all members are very welcome to attend.

Any school groups interested in attending should  
contact the secretary to reserve places

Secretary: Dr D S Martin
