

# CoRWM Interim Storage Report

Marion Hill

Leader, CoRWM Interim Storage  
Working Group

# Scope of Report

- conditioning, packaging, interim storage and transport of higher activity radioactive wastes
- management of spent fuels
- management of plutonium and uranium
- R&D on all the above
- (not new build wastes)

# Introduction

- definition of storage – intention to retrieve
- CoRWM 2006 recommendation 2: need for robust interim storage, with due regard to store security, store longevity, prompt immobilisation, minimising need to repackaging, transport
- relationship to NDA national storage review

# Conditioning and Packaging

- waste quantities and characteristics
- progress in conditioning and packaging
- future conditioning and packaging
- regulatory framework
- LoC process
- dealing with failed and out of spec packages

# Storage Arrangements

## *Current*

- legacy facilities
- short-term stores
- longer-term stores

## *Future*

- plans at each site
- evaluation of robustness
- safety and security
- transport
