Membership and Open University degrees

The Institute of Physics welcomes applications for membership from Open University students who are studying physics-based degree programmes.

The requirements for each class of membership are:

- Associate Member open to an Open University student who is studying any OU programme containing physics-related modules.
- Member (MInstP) open to candidates who have already obtained an OU honours
 degree with the majority of courses in the physical sciences and/or engineering.
 The named degrees BSc Physical Science (B27), BSc Geosciences (B25), BSc
 Molecular Science (B26) and BSc Mathematics and Physics (Q77) all meet the
 requirements for Associate Membership as do the physics and astronomy pathways
 through the Natural Science degree (Q64).
- Fellow (FInstP) open to those who meet the requirements for membership of the Institute, are working in a senior position and can demonstrate a significant contribution to their profession over a sustained period.

If you would like to join the Institute in any of the categories above the application form is available on our website.

Chartered Physicist

The title *Chartered Physicist (CPhys)* guarantees that a physicist's competence in terms of education, experience and professional responsibility has been critically scrutinised and assessed to the satisfaction of the Institute's Council. The educational requirement for CPhys is an IOP accredited integrated Masters degree. Students with an accredited Bachelor degree will need to show equivalence to integrated Masters level

Current OU students wishing to progress to CPhys should ensure they obtain an honours degree that meets the requirements outlined in this document. Graduates that spread their study over more than one scheme or received transferred credit for modules listed as compulsory should apply to have their programme of study individually assessed.

Students or graduates seeking further advice on the suitability of OU degrees for membership or Chartered Physicist, or to have their degrees individually assessed, should contact accreditation@iop.org

Valid for graduation dates up to and including 31/12/2002

A degree containing physics from the Open University is accredited provided it is an honours degree and complies with the requirements detailed below.

Compulsory

MST207 Mathematical Methods, Models & Modelling (formerly MST204)

Options

Any five 30 point courses drawn from List 1 and 2, only two of which may be drawn from List 2.

List 1

S271 Discovering Physics ST291 Images and Information

SMT356 Electromagnetism (or SM352)

One of the following:

S281 Astronomy and Planetary Science

S256 Matter in the Universe

One of the following:

SM355 Quantum Mechanics

SM351 Quantum Theory and Atomic Structure

One of the following:

S272 The Physics of Matter

T236 Introduction to Thermofluid Mechanics

List 2

S342	Physical Chemistry: Principles of Chemical Change
S357	Space, Time & Cosmology (or S354)
MST322	Mathematical Methods & Fluid Mechanics
T393	Electronic Materials and Devices
T331	Engineering Mechanics: Solids & Fluids

Valid for graduation dates from 31/12/1999 up to 31/12/2007

A degree containing physics from the Open University is accredited provided it is an honours degree and complies with the requirements detailed below.

The degree transcript must show:

- all the compulsory courses and 120 points from group 2
- at least one residential course
- at least 60 Level 1 points from science, mathematics or technology

The level 1 requirement may be replaced with level 2 or 3 courses if the course code begins with S, M or T.

Group 1: Compulsory

S207 The Physical World*

MST207 Mathematical Methods, Models & Modelling (or MST204)

* Students can meet this requirement by passing either:

S271 Discovering Physics + S272 The Physics of Matter
S271 Discovering Physics + ST291 Images and Information**

Group 2: Options

S281	Astronomy & Planetary Science
ST291	Images & Information**
T236	Introduction to Thermofluid Mechanics
S357	Space, Time & Cosmology (or S354)
S381	The Energetic Universe
SMT359	Electromagnetism (or SMT356)
SM358	Quantum Mechanics (or SM355)
MST322	Mathematical Methods & Fluid Mechanics
T305	Digital Communications (or T322)
T333	Heat Transfer: Principles & Applications
T393	Electronic Materials & Devices

^{**} ST291 may not be counted in both group 1 and group 2

Group 3: Experimental work***

SXR207	Physics by Experiment
SMXR358	Quantum Mechanics: Experiments, Applications and Simulations
SMXR359	Electromagnetism: Experiments, Applications and Simulations (or
	SMXR356)

*** This requirement can also be met by one of the following:

S271	Discovering Physics	
S272	The Physics of Matter	
S207	The Physical World (in 2000)	

Valid for graduation dates from 31/12/2004 up to 31/12/2013

A degree containing physics from the Open University is accredited provided it is an honours degree and complies with the requirements detailed below.

Current students that wish to obtain an accredited degree but will be affected by the withdrawal of level 2 and 3 residential courses should contact accreditation@iop.org for advice.

Compulsory

All of the following must be included:

S207 The Physical World

MST209 Mathematical Methods and Models (or its predecessor MST207)

SM358 The Quantum World *(or its predecessor SM355)* SXP390 Science Project Course: Radiation and Matter

Options

At least one from the following must be included:

SMT359 Electromagnetism (or its predecessor SMT356)

S357 Space, Time and Cosmology

Experimental work

Successful attendance at two residential schools is required with at least one at level 3.

Compulsory

One or both of the following:

SMXR358 Quantum Mechanics: Experiments, Applications and Simulations

(or SMXR355) *

SMXR359 Electromagnetism: Experiments, Applications and Simulations

(or SMXR356)

Options **

If only one school is taken from the compulsory section, one of the following must be included:

SXR207 Physics by Experiment SXR208 Observing the Universe MSXR209 Mathematical Modelling

^{*}This requirement could be met by passing the previous course SM355 prior to 2002 providing the embedded residential school was successfully completed.

^{**} This requirement could be met by S207 The Physical World taken in 2000 or MST207 Mathematical Methods, Models and Modelling provided the embedded residential school was successfully completed.

Valid for graduation dates from 31/12/2011 up to 31/12/2019

A degree containing physics from the Open University is accredited provided it is an honours degree and complies with the requirements detailed below.

Compulsory: All of the following must be included:

S217 Physics: from classical to quantum MST210 Mathematical methods and models *

S382 Astrophysics

SM358 The quantum world SMT359 Electromagnetism

Experimental work: Experimental work must be included by completing option 1 or 2:

Option 1:

SXPA288 Practical science: physics and astronomy

Option 2:

Two from the following, one of which must be at level 2 or 3:

SXR103 Practising science S155 Scientific investigations

TXR120 Engineering: an active introduction

SXR207 Physics by experiment SXR208 Observing the Universe MSXR209 Mathematical modelling TXR220 Engineering in action

SMXR358 Quantum mechanics: experiments, applications and simulations SMXR359 Electromagnetism: experiments, applications and simulations

Project work: At least one from the following must be included:

SXP390 Science project course: radiation and matter

SXG390 Science project course: geosciences SXN390 Science project course: science in society

T450 The engineering project

Notes

All previous versions of the listed modules may be counted towards this scheme.

The experimental work requirements in option 2 can be met by embedded residential schools associated with older versions of the listed physics and mathematics modules and S103 Discovering science.

^{*} The 30 credit module MST224 Mathematical methods will be accepted in place of MST210 for students that are unable to take 150 credits at level two.
