

# Nuclear Industry Group

### AIM

To promote the diverse roles that physicists have in all aspects of the nuclear industry, including the civil and defence-related sectors.

### PURPOSE

The Nuclear Industry Group was formed in 2010 to promote links between physicists involved with, or interested in, any aspect of the nuclear industry. The group's membership reflects the diverse roles that physicists hold within it.

We recognise that the nuclear industry is of interest to a broad audience and so we seek to engage and include those who are not directly involved in it. The group therefore welcomes members from a wide range of backgrounds and interests. Whether you have been in the industry for many years, are a student considering a career in this sector or are someone with a general interest in this field, we look forward to welcoming you as a member and meeting you at an event soon.

### ACTIVITIES

The group:

- holds relevant speaker meetings at least once a quarter
- organises half-day seminars for currently trending topics
- arranges tours to facilities
- publishes an annual newsletter for members
- website includes an events calendar of conferences and meetings of interest to group members
- includes access to the group's member network via MyIOP where members may contribute to any number of interesting discussions and debates
- awards conference bursaries to research student members through the IOP Research Student Conference Fund

Meetings are held in a variety of UK locations to reflect the geographical spread of our members and at times that are sensitive to regular working hours.

### HOW TO JOIN THE GROUP

All groups are open to all IOP members as part of their member benefit package (at no extra cost). You may join a group at any time via the MyIOP website, found at [www.iop.org](http://www.iop.org).

### FURTHER INFORMATION

To contact the group and for more information about the group's activities, please see our website at [www.iop.org/activity/groups/subject/nig](http://www.iop.org/activity/groups/subject/nig). If you would like to know more about the Institute's groups, please see [www.iop.org](http://www.iop.org) or contact [groups@iop.org](mailto:groups@iop.org).
