Announcement regarding Juno programme and applications

In view of the ongoing Covid19 situation and the work many universities are undertaking to ensure that the health and wellbeing of students and staff are protected, while maintaining high standards of teaching and research, we would like to provide an update regarding the Juno scheme. We recognise the need to be flexible and enable those working on their Juno applications and action plans to be supported at this time.

Extension of deadlines for applications

We appreciate that there has been an extreme amount of disruption and workload for everyone over these past few months and a decision has been taken to extend the application deadlines for all involved in the Juno scheme by twelve months. We are aware that there may be cases where this causes difficulties with aligning to other award schemes and are open to discussion regarding this.

Juno April 2020 submission round

The submission round planned for the 23 April deadline has been cancelled and all those who had submitted an intention to apply have been contacted to establish how they wish to proceed. Where an application or renewal has been prepared for this submission there will be no requirement to update the data if the submission is made for the November 2020 deadline.

Juno November 2020 submission round

We would request that due to the twelve-month extension that applications for the November submission are only from those that had prepared to apply in April 2020 or who are unable to take up the offer of the extension.

Departmental visits for the remainder of 2020

Champion renewal visits and Practitioner to Champion visits will now be scheduled to take place in 2021.

If you have any queries about this information please contact Angela Townsend juno@iop.org
