Degree Recognition

The degree recognition scheme is an important part of the Institute's support for interdisciplinary and combined degree programmes.

The primary aims of Institute recognition are to:

- recognise the value of physics-based interdisciplinary and combined degree programmes
- support the diversity of physics-based degree programmes and departments that provide such programmes
- encourage the study of physics and related subjects where they appear throughout the HE sector
- guarantee to potential students that a degree programme meets the educational requirements for Membership of the Institute and provides a route to Registered Scientist (RSci) and Chartered Scientist (CSci).

The Institute of Physics is a leading scientific society. We are a charitable organisation with a worldwide membership of more than 50,000, working together to advance physics education, research and application. We engage with policymakers and the general public to develop awareness and understanding of the value of physics and, through IOP Publishing, we are world leaders in professional scientific communications.

In September 2013, we launched our first fundraising campaign. Our campaign, [Opportunity Physics](#), offers you the chance to support the work that we do.
